

'Food Glorious Food'.

I understand that trade is buying and selling goods and services.  
Profit is the money that a trader gain when he or she sells something.

Human geography teaches us how people affect the earth. It includes economic activity such as trade links.

Farmers from other countries export their goods to the United Kingdom. This is usually because the climate is not suitable to grow the crops here. Some examples are bananas and oranges. How many other fruits or vegetables do you eat that are imported into the United Kingdom?

The equator is an imaginary line around the Earth.

The hemispheres of Earth divide the globe into two equal parts. The Northern and the Southern.

Can you find a link with the country some fruit such as bananas and oranges, are imported from and which hemisphere they are grown in?

Play a game with someone in your family - 'I spy a country beginning with ...' The food we eat comes from countries all over the world.

A globe is a spherical model of Earth, it has a map of the world on it.

A map is a picture showing the features of an area of the earth. An Atlas is a book of maps. Use the contents page in at Atlas to find the countries where your food has travelled from.

Look at some food packaging to discover which country your food has been imported from. Use a globe or an atlas to locate different countries in the world and to ascertain 'which food came the furthest?'
